-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 June 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **3DETAILED ACTION**

#### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. The embodiment of claim 1, as filed on 6/19/09;
- B. The embodiment of claim 11, as filed on 6/19/09;
- C. The embodiment of claim 20, as filed on 6/19/09.

2. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). No claim is generic.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the features of "conditioning and premelting", "geometrical alignment", and "joining the wafers at a processing temperature of the glass pastes using a mechanical pressure", while common to all three species, are not inventive "special technical features". Vanfleteren discloses these limitations, as discussed in the previous office action. Species A, B, and C each includes special technical features that the other two species do not. Species A includes the features "at least two wafers are located in a mid position of a stack of wafers" and "applying structured layers... on two wafer sides of two wafers to be connected". Species B includes the limitations "system wafer supporting microelectromechanical or electronic structures with a cover wafer also supporting electronic structures" and "applying a first electrically non-conducting, structured layer and a second electrically conducting structured layer, each one with a glass paste on at least one face of the wafers". Species C includes the limitations "a system wafer carrying micro-electromechanical or first electronic structures with a cover wafer, carrying second electronic structures" and "applying structured layers of electrically non-conducting and electrically conducting glass pastes on two wafer sides of said wafers". Thus, there is no claimed single general inventive concept between the three species.

### ***Conclusion***

5. This requirement for election of species is necessitated by the amendments to the claims, as filed on 6/19/09. No response to the arguments filed on 6/19/09 is included in this election requirement, but will be included in the subsequent action on the merits.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Parendo, whose can be contacted by phone at (571) 270-5030 or directly by fax at (571) 270-6030. The examiner can normally be reached on Mon.-Thurs. 7:30 a.m. - 5:00 p.m. ET and on alternate Fridays 7:30 a.m. – 4:00 p.m. ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Smith, can be reached on (571) 272-1907. The fax number for the organization where this application or proceeding is assigned is 571-273-8300.
